

NexaTech Solutions - Company Device Usage Policy

Policy ID: IT-DEVICE-015

This policy defines acceptable use and security requirements for company-provided laptops, mobile devices, and equipment.

1. Approved Devices

Employees must use company-approved devices for accessing confidential business systems and information.

2. Software Installation

Employees must not install unauthorized software or applications on company-managed devices.

3. Device Security

Company devices must use approved security controls and remain protected with current operating system and security updates.

4. Remote Usage

Employees working remotely must protect company devices from unauthorized access and use secure network connections.

5. Lost Devices

Lost or stolen company devices must be reported immediately to the IT security team.
